

2
3 METHOD FOR POLYMERIZATION OF ELECTRONIC
4 AND PHOTONIC POLYMERS

5
6 ABSTRACT OF THE DISCLOSURE

7 A method for polymerizing electronic and photonic polymers,
8 wherein an aromatic monomer is combined with a hematin catalyst
9 derivatized with at least one non-proteinaceous amphipathic group,
10 and a peroxide initiator, and employing a template, wherein the
11 aromatic monomer aligns along the template and polymerizes to form
12 a complex comprising the polymerized monomer and the template.
